

GLOBAL TECHNOLOGY SUMMIT

John Luo

IoT Research Supervisor
Ford Research and Innovation Center

John Luo has worked with the Ford Motor Company since 2006. He started his career at Ford in Australia and has worked on projects serving customers globally. Before coming to Silicon Valley, John completed a four-year assignment in China as a Project Manager developing and launching the electrical/electronics aspects of multiple vehicle programs.

John joined Ford's Research & Innovation Center in Palo Alto in 2015 to represent Asia Pacific product development. He also leads an Internet of Things research team to pursue emerging opportunities through Ford Smart Mobility, the company's plan to be a leader in connectivity, mobility, autonomous vehicles, the customer experience, and data and analytics.

John holds a Bachelor of Engineering (Electrical & Computer Systems) with Honors and a Bachelor of Science (Computer Science), both from Monash University, Australia.
