Walter De Brouwer

Co-Founder, CEO

Doc.ai

@walterdebrouwer

wdebrouwer

Walter De Brouwer is the Founder and CEO of Palo-Alto based [doc.ai](#), which is building an AI-powered life science repository on the blockchain for precision medicine that follows biological markers across the omics.

Walter's career as an entrepreneur started 27 years ago in Europe when he left academia. He moved to Silicon Valley in 2011, where he founded Scanadu Inc. now Inui Health, an FDA-cleared \$60 million venture-backed mobile health company, as well as doc.ai and Gen.Life, a Chinese insurtech company focusing on machine learning on actuarial engines. In 2017, he co-founded Tokensoft, a smart contract developer in San Francisco. Two of his companies went IPO.

Walter sits on the boards of Scanadu Inc. and Generation Life Inc. and is a scientific advisor for Ubiome Inc. He holds a Ph.D. in computational linguistics and is a FINRA-licensed investment banker.

Walter's interests are in deep learning, computational linguistics, Turing machines and formal semantics in PLT Redex, a domain-specific language designed for specifying and debugging operational semantics.
