

GLOBAL TECHNOLOGY SUMMIT

Chackan Lai

Global Product and Innovation Risk
Visa Inc.

Chackan is an experienced payment industry executive who has been with Visa since 2003. A key leader in shaping the global payment ecosystem risk strategy, he co-led the initiative that set the US on its path to EMV deployment while enabling the use of mobile phones for PIN entry via the development of the PCI Software PIN Entry on COTS (commercial off-the-shelf) standards. More recently, Chackan was responsible for leading an ongoing evaluation and analysis of new and emerging technologies, such as blockchains, digital fiat currency and IoT, with a focus on evaluating their impact and providing strategic recommendations to Visa. Before joining Visa, Chackan worked in Asia and the UK, bringing with him extensive expertise in information security at both the strategic and implementation level.

Chackan is a graduate in Computer Engineering from Nanyang Technological University, Singapore and also holds a Masters of Science in Information Security from the Royal Holloway College, University of London.
