Steve Wilson

Vice President, Product for Cloud and IoT
Citrix

 @virtualsteve

 wilsonsd

Steve Wilson is currently Vice President of Product for Cloud Computing and Internet of Things (IoT) at Citrix. He has more than 20 years of experience developing and marketing products at multi-billion dollar technology companies such as Oracle and Sun Microsystems. Prior to Citrix, Mr. Wilson led development for a software product line with \$1 billion in annual sales. During his time at Sun Microsystems, he was an early member of the team that developed the Java computer programming system, the most widely used set of software development tools in history.

Steve Wilson is the lead author of "Java Platform Performance: Strategies and Tactics," published by Addison-Wesley. He holds a degree in Business Administration from the University of San Diego and a second-degree black belt from the American Taekwondo Association.

Citrix (NASDAQ:CTXS) is leading the transition to software defining the workplace, uniting virtualization, mobility management, networking and SaaS solutions to enable new ways for businesses and people to work better. Citrix solutions power business mobility through secure, mobile workspaces that provide people with instant access to apps, desktops, data and communications on any device, over any network and cloud. With annual revenue in 2014 of \$3.14 billion, Citrix solutions are in use at more than 330,000 organizations and by more than 100 million users globally.
