

European Technology Summit

Gareth Stokes

Partner
DLA Piper

Gareth Stokes focuses on information technology, outsourcing and intellectual property-driven contracts.

Gareth's experience spans numerous complex major procurement and sourcing projects within heavily regulated industries. Most such engagements involve elements of service delivery on-shore, with other elements delivered further afield, whether near shore within the newer EU Member States or offshore in India, China and emerging economies. These projects tend to involve innovative contractual structures, including joint venture arrangements, multi-level framework and call off structures, trust arrangements and other multi-contract arrangements.
