## Luke Sully

Founder & CEO  
Custody Digital Group

 [lukesullyblockchain/](https://www.linkedin.com/company/lukesullyblockchain/)

Luke Sully is founder and CEO of Custody Digital Group a UK/US digital asset custodian. CusDG provides an insured, highly secure, institutional-grade custodian service for a variety of digital assets and blockchain based information systems for organisations, consortia and governments.

Luke was formerly IBM Security Services' first global lead for blockchain, working with financial services clients across use case, implementation, encryption and security intelligence issues. He has also advised several asset and non-asset backed crypto currency companies across regulatory compliance, technical design, security and business development issues.

Prior to IBM, Luke was a Director at PwC LLP, the professional services firm, where he also co-founded the US firm's blockchain and crypto finance practice in financial services in 2013.

He is a contributor to the Center for Sanctions and Illicit Finance based in Washington DC, and is a published author and speaker. Luke has a First Class honours degree in Languages and studied Entrepreneurship at the Sloan School of Management, Massachusetts Institute of Technology.
