

# European Technology Summit

## Gary Barnett

Chief Analyst, Technology Thematic Research  
GlobalData

Gary Barnett leads the Technology element of GlobalData's Thematic research program, bringing together the combined research of all of GlobalData's technology analysts into a theme-based framework. Gary's primary research focus is the practical application of technologies and methodologies to help to deliver sustainable transformation. He also advises organisations in the public and private sectors on the topics of the Strategy and Architecture, Digital Transformation, and on the impact of emerging technologies like Quantum Computing, Blockchain, the Internet of Things, and Blockchain.

Before becoming an analyst, Gary worked first as a software engineer then as an enterprise architect in the UK and France, developing and designing mainframe and large-scale client-server applications. Gary also served as CIO and Membership Manager for the Royal Yachting Association, the UK's national body for sailing. Gary continues to serve as the CTO for a non-profit IoT project. In 2015, Gary was elected to Fellowship of the Royal Society of the Arts.
