

Middle East Technology Summit

Michael Stead

Senior Associate, Intellectual Property and Technology (Birmingham)

DLA Piper

Michael Stead is a technology lawyer with deep expertise in AI law and regulation, combining legal advisory with a strong understanding of the underlying technology. He advises on a wide range of IT matters, including digital transformation, outsourcing, and data protection, with a particular focus on helping organisations develop and deploy AI responsibly and compliantly.

Michael has led cross-border AI legal projects and works closely with technical teams to address real-world implementation challenges. He frequently advises on the practical impact of AI regulations, such as the EU AI Act, and supports clients in designing governance, risk, and compliance strategies for AI systems.

Lead of the firm's international AI Working Group, Michael is actively involved in the firm's global technology initiatives and integrates legal, technical, and data science insights into his client work.
